

# Call My Name

Jennifer Rush

You and I once had a taste  
Of a love so out of place  
It was clear and could not be denied  
And we never needed lies So here we stand face to face  
Knowing that losing lingers  
I know myself - there'll be nobody else  
Who will ever take this place in my heart, oh You just call my name  
And I'll come running for you in the night  
You just call my name  
And I'll come running right back into your life  
If you ever need my love  
Call my name Tell me, did we simply collide  
With a moment passing in time  
Or can you tell me you will never forget  
Now your thoughts are so far from gone There are no chains to hold you down  
I told you, long time ago  
This time's mine for moving on  
Still, there's one thing I need you to know, oh You just call my name  
I'll come running for you in the night  
You just call my name  
And I'll come running right back into your life  
If you ever need my love  
Call my name If you find you need my love  
Then it's time we start over again, oh Just call my name  
And I'll come running for you in the night  
You just call my name  
And I'll come running right back into your life  
If you find you need my love  
Call my name, oh Just call my name  
And I'll come running right back into your life  
You call my name  
And I'll come running for you in the night (If you ever, and if you ever need my love)  
And I'll come running right back into your life  
And I'll come running for you in night  
And I'll come running right back into your life
