To The Top

Isotonic Sound

Uhh, yeah, let's rock with me
R.Less, hey, let me do it, yeah
I'm just tryin' to play my position
If you seek, let me be your physician
Guarantee I'm the piece you've been missin'
In your life, baby
Let me say it's a pleasure to know you
If you gave me the chance I will show you
I got so much love in here for you
You should take it, yeah
Tell me how to get in that zone with you
'Cause the minute you said hello
You already knew that you had me, baby, yeah
I just wanna be in that zone with you
'Cause I was thinkin' that we could take this
Further than friendship, from friendship to love
Girl, you know I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Won't come down
So that's why I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Making love on my cloud
Yeah, I just gotta follow my intuition
Let me be that scratch for your itchy
I'm your geenie I grant what you wishing
Just say, oh, oh
I'm convinced that you need me
That's funny 'cause, girl, you complete me
Now just sleeping but feel like I'm dreaming
Baby, when you're with me
Tell me how to get in that zone with you
'Cause the minute you said hello
Right there you knew you had me baby and I
I just wanna be in that zone with you
And I was thinking that we could take it
Further than a friendship, from friendship to love
Girl, you know I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Won't come down

So that's why I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Making love on my cloud
And I promise you won't wanna come down
I will lift you up and then I'll spin you right around
Which will make our way up to the clouds
And somehow you will take hold of my hand and I will guide you
I'll be taking you, taking you, taking you straight to the top
Straight up to the top
And when we get there I promise you don't wanna come down
Won't come down
So that's why I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Making love on my cloud
Girl, you know I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Won't come down
So that's why I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Making love on my cloud
Girl, you know I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Won't come down
So that's why I wanna take you straight up to the top
And when we get there I promise you don't wanna come down
Making love on my cloud
