west

Michaelangelo

Come out West and see
Best that could be
And all you want stay permanently
Come out West and seeNow climb up on a rock
And stretch out in the sun
And close my eyes and let
Imagination runAnd tracing your initials
In the shining sand
I'm counting out the days
Till I see you againWho knows what the future holds
Or where the corns may fall
But if you don't come out West and see
You'll never know at allI look off in the distance
Blow a kiss away
A thousand miles between us
Disappears from thereI watch as all the starlings
Flying from the north
The beating of their wings
There goes the beating of my heartI sleep out in the desert
Under the stars above
And keep making an effort
To wonder in your loveWho knows what the future holds
Or where the corns may fall
But if you don't come out West and see
You'll never know at allCome out West and see
The best that it could be
And all you want stay permanently
Come out West and see
