Death By Robot

Feed Me

Newsflash, Newsflash:They say robots are coming to tear us apart.
They'll be landing on Earth tomorrow.
So we better get a good head start.
No time to pack our things,
Take our bikes and ride for the setting sun.
As the city around us burns,
We'll be taking them on one by one.
We'll be taking them on one by one.Mayday, Mayday:
A message to anyone still left alive.
Our defences won't last much longer,
But to the end, we've put up a good fight.
No time for regrets now,
Grab a gun and get to the front line.
As the walls begin to crumble,
We'll be defending the planet with our lives!
We'll be defending the planet with our lives!
