

Remember

BT

I, I remember I know how you feel, I'm feeling it too
I hold my heart, I dream of you
I see your face, I feel it too
Searching skies, I need you, I miss you I need you, I want you
I love you, love you, I love only you, I love you Remember me near, there may be times when it's not right
For me to be there but remember me near
Remember me near, there may be times when it's not right
For me to be there but remember me near, remember Take this and hold, my love for you
I love you, love you, I love only you, I love you Remember me near, there may be times when it's not right
For me to be there but remember me near
Remember me near, there may be times when it's not right
For me to be there but remember me near Remember me near, there may be times when it's not right
For me to be there but remember me near
Remember me near, there may be times when it's not right
For me to be there but remember me near
