Down Easy

Measure

I anticipate the sound
That breath of silence and the words come out
And I feel it all
Think I felt it all along
So don't you don't you wait

Hope can carry you so high
All those nights I missed you so much sleeping by your side
Planning for the fall
I didn't feel the sun at all
So don't you don't you wait

We've come so far
That maybe maybe this is just as far
As you can take me with
No big alarm or siren sound
You'll find the words and let me down
Easy
Let me down
Easy

Light half illuminates your face
I almost love you in this loose embrace
Yeah I feel it all
Like I felt it all along
So don't you don't you wait

We've come so far
That maybe maybe this is just as far
As you can take me with
No big alarm or siren sound
You'll find the words and let me down
Go on while no one is around
And say the words to let me down
Easy
Let me down
Easy

Oh, go on
It's easy

Let me down
Easy
