

# How We Woke Up

## The Moth & The Flame

Suspend me in my past  
And this is how I woke up  
Alone  
Alone You're dangling by a string  
Above everything you could be  
And this is how you woke up  
Alone Sharpen their teeth  
On your neck  
Remember your flaws  
Like a bad dream  
You wanna wake up  
Please wake up, oh  
Please wake up, oh  
Please wake up, oh  
Please wake up There's still time Just for a moment as we stand  
Projecting our thoughts into the air  
As if we had planned to stick before  
Our minds danced hand in hand  
Cold your breath by both our lives  
Told like stories to our eyes  
All of our world frozen in time  
And this is how we woke up You remember who we are  
We were nothing in the dark  
As if we were something in the light  
I'd love to know  
Love to know  
The you will be all fine This  
Is  
How we woke up  
This  
Is  
This  
Is  
How we woke up  
This  
Is  
This  
Is  
How we woke up
