

Scary Sad

All

All in my mind but there's no shaking Bring the scary, sad girl back to life Scary, sad things out of my mind
Always on time, but there's no time to None in her heart, some of the things She did seemed almost nice But
I'm to scary, sad to cry I can't stop the blush when things aren't right Feel it so strong but she's done it so
wrong All those scary, sad things; scary sad things Every secret family crime, all my love a waste of time Every
time she slit her wrists I wish she hit instead of missed Every doctor, every shrink, every bloody bathroom sink
All the filth we tried to hide, just a face I needed to be beside All those scary, sad things are what any love
brings Scary, sad girl leave my happy lone world Every girl that I ever hated was just a monster that I created
Maybe if I close my eyes real tight then the scary, sad Things will go away and I'll quit living in yesterday I'll
just smile and laugh at all the scary, sad None of the doctors could find a cure Things you put me through Just a
scary, sad girl in a scary, sad world None of the shrinks could make her think About anyone else but her I want
to go home, I want my mom to make The bad things go away Scary, sad girl treat me that way I want to forget I
could ever let any All those scary, sad things; scary, sad things Feel it so strong, but she's done it so wrong
Cause she's done it so right Truth comes out in dreams at night All those scary, sad things; scary sad things
