

# Forever

[Idina Menzel](#)

We thought we had it all  
We thought we'd go unscathed  
We thought our love  
Would border on infinity We thought that we were free  
The world would disappear  
We left ourselves wide open  
And we had no fear But forever came and went  
Forever stumbled through  
Forever had poor sense of time  
And made a mess of me and you Forever had us fooled  
We fell for it again  
And now time is standing still  
Forever Lying next to you  
But you're already gone  
And too much has been said  
And it can't be undone It's so hard to comprehend  
When ashes fade to dust  
I touch your water  
And the iron turns to rust So forever came and went  
Forever stumbled through  
Forever had poor sense of time  
And made a mess of me and you Forever had us fooled  
We fell for it again  
And now time is standing still  
Forever came and went We thought it had it all  
We thought we'd go unscathed  
We thought our love  
Would border on infinity But forever was a shame  
It stole a little piece of us  
To live up to it's name  
Was really just too much And forever came and went  
Forever stumbled through  
Forever had poor sense of time  
And made a mess of me and you Forever came and went  
Forever stumbled through  
Forever had poor sense of time  
And made a mess of me and you Forever had us fooled  
We fell for it again  
And now time is standing still

Forever came and went(Forever, forever, forever)

Oh, I thought we had it all

(Forever, forever, forever)

Oh, oh, ohI thought we had it all

(Forever, forever)

Every day 'til the end

(Forever)

You and me, oh, oh

(Forever, forever, forever)
