Clouds

David Nail

Well, the turn signal's clicking and the seconds are slipping away
Just a little bit more of this turnpike and so much to say
The airport traffic it slows us to a still
You turn the radio down and leave one hand on the wheel
Well, I don't know how to tell ya what you wanna hear
You see guys like me, we just disappear
And you deserve someone who'll never leave
But girl the last few days are the best we'll ever be
Chorus:
Isn't every goodbye a chance to become

A bittersweet memory for someone
Don't you ever look back with regret
Share with me a moment for all time
In a corner of your mind
If you've never seen New England in the fall
Should you find yourself up there give me a call
But before I make my way into the crowd
Could I share one more kiss while we're still in the clouds?
Repeat Chorus Twice
In a corner of your mind
