Louder

Neon Jungle

Stepping outside my head
I don't want to hear what you said
I don't want to fall down flights of stairs
Trip wires everywhereI'm climbing
Trying to get from under you
If you ask me back I'll go
I need distractionsSo pull every pin from every grenade
And blow it all up in my faceMake everything louder
Do it till my skin vibrates
Make everything louder
I want to hear my eardrums breakMore volts in the system
Drown out the symptoms
Everything louder, louder
I don't want to hear youJust want to feel it, feel it
Louder, louderPut me in a sound proof room
A million miles from you
My ears would still be bleeding
Shots of noise
Still seeping through
I wish I couldn't hear youSo pull every pin from every grenade
And blow it all up in my faceMake everything louder
Do it till my skin vibrates
Make everything louder
I want to hear my eardrums breakMore volts in the system
Drown out the symptoms
Everything louder, louder
I don't want to listenJust want to feel it, feel it
Louder, louderYou got the power
You got the power
You know the words that work
You know the words that work on meYou got the power (You got the power)
You got the power (You got the power)
You know the words that work
You know the words that work on meMake everything louder
Do it till my skin vibrates
Make everything louder
I want to hear my eardrums breakMore volts in the system
Drown out the symptoms
Everything louder, louder

I don't want to hear youJust want to feel it, feel it
Louder, louder (x4)
