The Watermark High

Elliott

feel this heaven pours over me carries me backwards as I await and then I feel im going back again and I feel this way found the river that covers me feel they talk with alarm just sirens born with faulty switches again found the river that covers me feel the river has run to cover your cost what ever the loss these days force the water over me blue line kerosene cleaner force the water over me two step dance hall leader force the water over me feel I cant stop dreaming force the water over me feel I cant stop breathing cool side carousel revolves and wash away this call feel this river all over me lily white lies like to form you wear your lie right on your coat these days feel im ready im coming down face down water filled breather feel im ready im coming down feel I cant stop screaming
