Your Silent Face

I SATELLITE

A thought that never changes Remains a stupid lie It's never been quite the same No hearing or breathing No movement, no colors A search that shall remain Just silence We asked you what you'd seen Rise and fall of shame You said you didn't care Sound formed in a vacuum May seem a waste of time It's always been just the same No movement no lyrics No hearing or breathing Just nothing The sign that leads the way You've caught me at a bad time The path we can not take So why don't you piss off
