Hoops

The Rubens

Blood stains, won't make it matter got good things, got you.
Hoops, and everything get back never get back too soon.Are you lonely, are you there when I'm not in the room?
Are you lonely, only a part of this when you choose.Is it real, is it something that you cannot touch?
Do you feel, do you feel that you feel too much?Blood stains, won't make it matter got good things, got you.
Hoops, and everything get back never get back too soon.Blood stains, make confusing patterns, they lead me to you.
Hoops, and everything get back never get back to soon.Something crazy, something changing in the way you talk,
you were lately, lately you were trying to be the one on top.Come on down, come on and give it to me like you should, gonna drown, I give up and get on with the life is good.Say it on telephone, say it in my head, say it in my head, say it in my head,Writing down all the things gone wrong, and the ink ran red, and the ink ran red, and the ink ran red.Blood stains, won't make it matter, got good things, got you. Hoops and everything get back never get back too soon.Get back never get back too soon, get back never get back too soon, get back never get back,get back never get back, get back never get back too soon, get back never get back too soon, yes it's true.Hoops and everything, get back never get back, get back never get back too soon, get back never get back too
soon, get back never get back, get back never get back.
