The Future

Guy

Brother, sisters
Give and eat for the futureWe can be lovers or the people
Let's join hands, stopping all the dangers
We can be a better world
For the futureI'm saying that now clear, ripping in confusion
No one knows what is an illusion
There's a chance for us in the future
I'm singing of theThe future, we can be together
The future, better than the world to tell you
The future, oh, we can be so different
The futureThe future, the future
The future, the futureJealousy and being strife
If we keep this up, we all lose our life
Love and peace is what we need
TodayLook around we can make it happen
It's not hard, we have other reasons
Take a chance and make it last foreverThe future, we can be together
The future, don't you worry about a thing, no baby
The future, mothers
The future, fathers, raise your children rightThe future, don't worry about them in the future
The future, it will be all, it will be alright
The future, I'm talking about
The future, I'm singing about the futureThe future, the future
The future, I can't wait for the future
The future, everything will be alright
The future, everything will be alrightIt's future, it's the future
It's future, it's the future
It's future, it's the future
It's future
