

The First Day

[Molly Drake](#)

This is the first day of the rest of my life.

Could be the first day of the best of my life.

There could be sunlight there could be rain, but losing or winning this is beginning all over again. This is the birthday of a brand new start.

change your direction, change your heart.

When i think of today i feel tempted to say destiny do your worst, of the rest of the days of the rest of my life. Its only the first. Each little day is a world of its own. Each little day is a tool. Whenever the day has drifted over, its back to the room. As I lie alone in the darkness waiting the next day birth I say for me what could better I be for everyone els on earth. Could be the first day of the rest of my life.

there could be sunlight there could be rain, but losing or winning this is beginning all over again.

This is the birthday of a brand new start.

Change your direction change your heart.
