Battlefield

Svrcina

No time for rest
No pillow for my head
No where to run from this
No way to forget

Around the shadows creep
Like friends they cover me
Just wanna lay me down
And finally try to get some sleep

We carry on, through the storm
Tired soldiers, in this war
Remember what we're fighting for

Meet me on the battlefield
Even in the darkest night
I will be your sword and shield your camouflage
And you will be mine

Echos in the shots wing now
We may be the first to fall
Everything can stay the same
Or we can change it all
Meet me on the battlefield

We're standing face to face
With our own human race
We commit the sins again
And our sons and daughters pay

Our tainted history
Is playing on repeat
But we can change if we stand up strong and take the lead

When I was younger, I was neigh
The generation, unafraid
If we airs to come, be brave

Meet me on the battlefield
Even on the darkest night

I will be your sword and shield your camouflage
And you will be mine

Echos in the shots wing now
We may be the first to fall
Everything can stay the same
Or we can change it all
Meet me on the battlefield
Meet me on the battlefield
