

Evolution

311

My computer is future shockin', download this and you'll start talkin'
Upgraded you're now walkin', compatible with all that is rockin'
Comin' on fast it's gettin' digital, it's so huge like a spiritual
Rippling out to every individual, this is life it is a miracle
Evolution has exponential timing it'll be
Half as long 'til the next breakthrough that blows our mind
It's up to the people to brave on with experimentation
Move up the species by using our imagination
But can we handle it? Could we dismantle it?
Or should we fear the void and just be para paranoid
If it's understood it could be used for good and would
If you will believe in all we can conceive
On the periodic table they got it all wrong
Let me lay it down for you in this song
People want PT, they want AU
Lemme tell you what you really ought to know
Figure out ways to master silicon
Fiber optic connectors, whatever's beyond
So many people don't even attempt to understand
The limitless possibilities of man
Evolution has exponential timing it'll be
Half as long 'til the next breakthrough that blows our mind
It's up to the people to brave on with experimentation
Move up the species by using our imagination
But can we handle it? Could we dismantle it?
Or should we fear the void and just be para paranoid
If it's understood it could be used for good and would
If you will believe in all we can conceive
I feel trapped I gotta adapt
Remain calm collected before I get zapped
My computer is a rebel acting all fine
And just like that payin' me no mind
What's up is it's program over come by a glitch?
Is it becoming conscious and if so ain't that a bitch?
I paid too much for this piece I'll be dammed if it tries
Any funny business it'll be the one that pays the price
Evolution has exponential timing it'll be
Half as long til the next breakthrough that blows our mind
It's up to the people to brave on with experimentation
Move up the species by using our imagination
Help, help, come, move using our imagination
But can we handle it? Could we dismantle it?
Or should we fear the void and just be para paranoid
If it's understood it could be used for good and would
If you will believe in all we can conceive
Yes can we handle it, we could dismantle it
We should not fear the void and just be para paranoid
If it's understood it could be used for good and would
If you will believe in all we can conceive
