Something In The Water

Example

I see them come, I see them go
Been coming here since I don't know
Come to play, here to talk
Or are they here to simply showSense of danger, bunch of strangers
Simply staring 'cross the room
Pretty soon they'll taste the water
And it ought to change their tuneShut the doors, the room is full and nobody leaves until
Until the sun comes out to play, 'til then we blow ourselves away
At the markets of Gibraltar, they lock up your sons and daughters
But the reason they come back is what's been pouring out the tapThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noI'm downing it, she downing it, we drown ourselves in love
Hit the town and it's astounding me, she fits me like a glove
I'm downing it, she downing it, we drown ourselves in love
And love tastes good to me todayI see them laugh, I see them cry
Been coming here since days gone by
Come to fight, here to shout
Or are they here to simply poutLack of passion, only fashion
People glancing 'cross the room
Pretty soon they'll taste the water
And it ought to change their tuneThey take a sip and lick their lips, start to shake their hips
Dance the night away, the gangsters put their knives away
The water drowns the fights away, I'm really liking life today
But don't let it confuse you when they wake
They'll all be back to usualThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noI'm downing it, she downing it, we drown ourselves in love
Hit the town and it's astounding me, she fits me like a glove
I'm downing it, she downing it, we drown ourselves in love
And love tastes good to me today, yoWanna lose your marbles? Step to the bar, smile at the bar girl
Ask for the glass of the tasty water

They only sell at the markets of Gibraltar
It'll be sure to sort ya, nights get longer, days get shorter
Don't ask questions, let's just knock it back
Say goodbye to tensionThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say noThere's something in the water, like oh
I think there's something in the water, like oh
I try to stop me drinking it but now I come to think of it
There's something in the water, I can't say no
