Mesh

Sounds from the Ground

Below the surface this day I need it light
Inside dimension lies another sacrifice
Once out of reach, we never speak, we never compromise
As they turned to gold the edges froze and seemed to turn to ice
All flight departures assembled not returned
Left in these passions I looked but never learned
There's hope, you've heard there's life in another world
Sometimes you'll find that truth is never kind
In the ghost lies a portrait of space that time is never here
In the mind of a fallen man, an easy day in another land
Ship sails out to sea, away from me, I just stand and stare
Assassin clears his hands, I know that and I wasn't even there
One day it came to mind we even leave the rest behind
Some day, I know, you get where you should go
There's hope, you've heard there's life in another world
Sometimes we'll find that truth is never kind
One day it came to mind we even leave the rest behind
Some day, I know, we even get where we used to go
There's hope, you've heard there's life in another world
