Have It Your Way

Mudvayne

What were you thinkin'?
What was going on inside your head?
Tell me were you drinkin' or just plain insane?
How were you feeling
With another couple thousand dead
Or were you lying just playing games?
Placing your bets, Russian roulette
Well, on your way to ending our days
You leave us all behind broken with precision
Blind leading the blind, have it your way
You've left us all behind riddled with deception
Pepper us with lime, have it your way
Was it for your father?
Did you get a little pat on the head?
That's the way to go boy, clean up this mess
Placing your bets, Russian roulette
You're on your way to ending our days
You leave us all behind broken with precision
Blind leading the blind, have it your way
You've left us all behind riddled with deception

Pepper us with lime, have it your way
Welcome to the new way
The new world order part two
But I'd be damned if they would ever dapple you
The world is crashing down all around us, all around you
The world is falling down
Have it your way, we have nothing to say
You leave us all behind broken with precision
Blind leading the blind, have it your way
You've left us all behind riddled with deception
Pepper us with lime, have it your way
Bombs, bullets and blood
The things that we don't see
The things that we can't touch
Nightmares of reality
The things that we don't see on the TV
Pledge your allegiance
To the bombs, bullets and blood

Pledge your allegiance
To the bombs, bullets and blood
