

Over My Head

John Farnham

In the light of the dashboard
Something flickers then dies
The last cigarette 'til the next town I'm driving through dreamland
Strange and familiar
And the rain is coming down Head's down low, moving so slow
And I really don't know why I feel so alive
When I look in your eyes It's over my head, night makes a burning sky
(Over my head)
Voices are calling
(Over my head)
Angels will beat their wings
God only knows why it all goes right over my head Send me away to think about it
I've driven two thousand miles or more
And the rain keeps on coming down Head's down low, moving so slow
And I really don't know why I feel so alive
When I look in your eyes It's over my head, night makes a burning sky
(Over my head)
Voices are calling
Over my head, angels will beat their wings
God only knows why it all goes right over my head And the singer says, "You're just marking time"
And the DJ says, "It's your love on the line"
Calling your name It's over my head, night makes a burning sky
(Over my head)
Voices are calling
(Over my head)
Angels will beat their wings
God only knows why it all goes (Over my head)
Night makes a burning sky
(Over my head)
Voices are calling
(Over my head)
Angels will beat their wings
God only knows why it all goes (Over my head)
Over my head
(Over my head)
It's over my head
(Over my head)
Over my head
God only knows why it all goes (Over my head)

Night makes a burning sky
(Over my head)
Voices are calling
(Over my head)
Angels will beat their wings
God only knows why it all goes(Over my head)
Over my head
Over my head
Over my head
God only knows why it all goesOver my head
Over my head
Over my head
