

# Shout Shout

## Werd (SOS)

[Werd]

Shout shout, dont leave a doubt  
Smash up the place and throw things about  
You wont change a thing by doing that  
Rant rave pull out your hair  
Turn on the tears I still wont care  
You dont move me an inch when you do thatYo I dont have a girl I know if I did  
She couldn't put up with the way that I live  
If I dont spit I smoke and I sip  
Thats all that is, my music is my life  
Its like, my mistress kids and wife  
Never acting right we always fight  
Were always in a mess  
We stress, confess, we mask it with a smile  
She could kick off anytime, were just fine, thats denial  
In the long run, were just battling through  
A few stages in some phases like mazes with moods  
So go crazy rip stages, we just misunderstood  
And been many places lately through this fighting we do  
But if others choose you and I dont like their patter  
I've no manners I will tell them right now it dont matter  
When youre hyped on that shite and youre acting all hyper  
I just sit back and write, I dont care for the dramaShout shout, dont leave a doubt  
Smash up the place and throw things about  
You wont change a thing by doing that  
Rant rave pull out your hair  
Turn on the tears I still wont care  
You dont move me an inch when you do thatBy now you might call it quits  
Is it worth it all the shit we did?  
I cant relate to relationships  
See thats what gives when the music is,  
My life, no nice, Im sitting in my flat  
Watching mice just run about coming from the cracks  
Looking for a little scrap, little reason to be feared  
Too clever for the traps, guess I got that feeling here  
So my idea, would be to stay in my placeOr change for their taste, or see, other  
Cultures intertwine through the rhymes in numbers  
When a global rap trend gets pushed out furtherShout shout, dont leave a doubt  
Smash up the place and throw things about

You wont change a thing by doing that  
Rant rave pull out your hair  
Turn on the tears I still wont care  
You dont move me an inch when you do that [x2]
