

# When I Come to You

# Jonny Lang

When I'm all alone, when I'm feelin' blue  
No one understands me, baby, nobody but you  
Through all the sleepless nights and the rainy day  
'Til the sun nowhere in view

The only way I make it through is when I come to you, yeah  
And in my darkest hour, when the midnight shadows fall

Baby, you got the power to make the angels come to call  
Yeah, well I just hold you in my arms and let the music in my heart  
Play the whole night through

And, baby, I feel so brand new when I come to you, yeah When I come to you, you make it feel alright again

When I come to you, you keep me from the howlin' wind  
And baby, I feel brand new when I come to you Yeah, When I come to you, I feel alright again  
When I come to you, baby, you keep me from the howlin' wind  
Before I feel brand new when I come to you
