Vegetable Car

Joshua Radin

Baby you don?t even know me
But one day I?ll get up the courage as you pass by you?ll see
Oh baby one look just might save me
I need you to slow by the corner, stop right in front of me
Till then I'll see you hopefully through
I do wish that you?d ask me to ride along
It wouldn?t be wrong to tell me more than I know about you
She drives a vegetable car, diesel, Mercedes, green, two door
I barely know who you are
Lisa Lobe glasses, I?d sure like to ask you to stay
Baby I need you to save me
The one thing that my heart requires is that you admire me
Till then I?ll see you hopefully through
I do wish that you?d ask me to ride along
It wouldn?t be wrong to tell me more than I know about you
She drives a vegetable car, diesel, Mercedes, green, two door
I barely know who you are
Lisa Lobe glasses, I?d sure like to ask you to stay
How do I know why the sight of you makes me weak?
Each time I see you turn onto my street
Your hair is always up in a bun, this girl is the one
She drives a vegetable car, diesel, Mercedes, green, two door
I barely know who you are
Lisa Lobe glasses, I?d sure like to ask you to stay, don?t go
