Always Be

Wesley, John

Could've been a night like any other
One of us has to drive, one of us gets to think
I'll force a laugh to break the silence
It's gonna get harder still before it gets easy
You can't keep safe what wants to break
I'm alone in this, I'm all as I've always been
Right behind what's happening
She's all lost in this, she's all like she'll always be
A little far for me to reach
I was just a boy like every other
I thought I was something fierce
I thought I was ten times smarter
Love would be something that I just know
(Something I just know)
How you gonna know the feeling till you've lost it
I've been losing plenty since
I'm alone in this, I'm all as I've always been
Right behind what's happening
She's all lost in this, she's all like she'll always be
A little far for me to reach
Maybe something else I'm missing
Something good and you're the reason
It's a dream but there's a real long way
I'm alone in this, I'm all as I've always been
Right behind what's happening
She's all lost in this, she's all like she'll always be
A little far for me to reach
I'm alone in this, I'm all as I've always been
Right behind what's happening
She's all lost in this, she's all like she'll always be
A little far for me to reach
