Midnight Magic

Erick E

Out of the setting sun
You can see the red sky rising
Could she be the one
Cutting through the blue still water
I hear our voices dancing on the wind
All the words that we said would never end
As I hold you in my arms
There suddenly appears the brightest star
Well come here closer baby
Didn't I tell you midnight magic
Would come someday, we'd sail away
If for the moment we let our dreams take over
Midnight magic is waiting for us
We can sail forever in our hearts
Heaven's not too far away
Remember Monterey
We'd sit and count the waves for hours
The ships would pass our way
In our hearts we could feel the power
I could see forever in your eyes
If you'd only let me stay tonight
Can't you see? We could have it all
Can't you hear? The north wind call
Well come here closer baby
Didn't I tell you midnight magic
Would come someday, we'd sail away
If for the moment we let our dreams take over
Midnight magic is waiting for us
We can sail forever in our hearts
Heaven's not too far away
As I hold you in my arms
There suddenly appears the brightest star
Well come here closer baby
Didn't I tell you midnight magic
Would come someday, we'd sail away
If for the moment we let our dreams take over
Midnight magic is waiting for us
We can sail forever in our hearts
Heaven's not too far away

Didn't I tell you, didn't I tell you
Ohh, baby
Didn't I tell you didn't I tell you
Ohh baby, heaven's not to far away
