

It's a Ruse

Rosey

What do you know
How do you do
I like the way you look at me with those eyes
Confidently wise
Pleasure I'm sure I've met you before
But baby not here maybe it was some other time This aint no kind of place for you
You better move around
A' better get up while you can
There aint no time to waste in here
When you got so much you forget what you had Ooo, don't follow me down, it's a ruse
Well they will lather your face
as they watch you waste away
Don't come around here no more, lookin' for me
Yea, no don't you come around Don't you cry mama's here to dry your eyes
No more tears now im gonna make you forget
Its over my pet, those bad cats catch ya
Cause it's through, woo woo, to the deepest part of you This aint no kind of life for you
You better move around
If you can trust your bartender
With a smile you are so tight
That was a big better fighter
Not everybody can be a contender Ooo, don't follow me down
It's a ruse
Well they will lather your face
as they watch you waste away
Don't come around here no more
Lookin' for me, yea
No no, don't you come around There's plenty things you could do
You don't have to sing the blues
To break your heart, can't you find a better handle
Plenty of stars in the sky
You don't have to be alright
They know you sell one big, big, dipper Oooo, don't follow me down
I tell you it's a ruse
Yea they will lather your face as they watch you lose your taste
Don't come around here no more
Lookin' for me yea
No don't you dare follow me down
