

Downside of Love

Adrienne Pierce

Golf trips, wine and dine
Stock tips, bottom line
Why suffer when you feel like this? Side effects, don't you worry
No time, what's the hurry
You're just a swallow away from bliss Heartbeat, so erratic
Can't sleep, don't you panic
There is a simple remedy Side effects, room is spinning
Realize, no one's winning
You've gotta get yourself free It's just the downside of
It's just the downside of
It's just the downside
It's just the downside of love Pink pill to match the blue
Overkill with something new
They're getting stronger every day Look now, it's improved
See how it gets used
Always a new act to the play It's just the downside of
It's just the downside of
It's just the downside
It's just the downside of love We turn fiction into fact
We do as we please
Turn human frailty into a disease Swallow this till you can't even feel
Look how far we've drifted
Look how far we've drifted apart It's just the downside of being uplifted
It's just the downside of a world that's shifting
It's just the downside
It is just the downside of love It's just the downside of being uplifted
It's just the downside of a world that's shifting
It's just the downside
It is just the downside of love
