# Phosphate Skin

## Son Volt

Everyone knows, ears to the ground
The daily drag finds the Oakland sky
Trench foot first and the spirit alive
Feel for the dawn, find the unbroken soundIt can only get better from here
Don't have any fearThe universal key turns the whole man to his kind
Phosphate skin as the fall birds fly
Evolution will make a mess out of you
Tryin' to find love in the sewer of subteraniaIt can only get better from here
Don't have any fearThe daily drag makes you stronger
The daily drag makes you stronger
Makes you strongerEver been a witness, ruinous in the morning
But the caged bird does sing a deeper blues
Ever seen the road less traveled and wondered
The best is with them, not with you
Where you been?It can only get better from here
Don't have any fear
