

If I Was You

Modwheelmood

Starts off early monday the beginning of the week
With a belly full of serpents wriggling round making me feel sick
Well I know I went out last night and it's the price I'll have to pay
But before I've even found my feet I've been discovered by tuesday

Green is the colour of your eyes

Grey is the colour of your skin

Yellow is the colour of your tongue tongue tongue

If I was you well I'm not am i

Well I know I'm not you you're not me

But everybody join in after three

One two three

Green is the colour of your eyes

Grey is the colour of your skin

Yellow is the colour of your tongue tongue tongue

If I was you well I'm not am i

Green is the colour of your eyes

Grey is the colour of your skin

Yellow is the colour of your tongue tongue tongue

If I was you well I'm not am i

If I'm not you who the hell am i
