

# Ever Wonder

Faith Evans

Baby, if I just been a little different lately  
But I wanna understand you so much more  
Open the door anything just tell me  
Open up and say it baby  
Lately, I've been tryin' to keep my distance crazy  
It's not what I expected at first  
But now I understand you gotta be a man  
And now it so clear to me so you can keep it real with me  
You ever wondered what makes a woman cry  
You ever wondered why sometimes you make me cry  
You ever wondered what makes a woman smile  
It's just the little things, you do to make me smile  
Maybe, we jumped into a situation too early  
But it's somethin' that our bodies can't ignore  
Now you want more but I think, I'm ready, yeah  
Just open up and say it baby  
Baby, not to mention that you got me feelin' crazy  
Every time you walk through my door  
My emotions won't let me say no  
And now I'm wonderin' if after this, you'll want me more

You ever wondered what makes a woman cry  
You ever wondered why sometimes you make me cry  
You ever wondered what makes a woman smile  
It's just the little things, you do to make me smile  
You see I'm feelin' you, you know I'm wantin' to  
Put all my trust in you 'cause ain't no guarantees  
And I'm so glad you do, I feel the same way too  
All we gotta do is keep communicating, baby  
You ever wondered what makes a woman cry  
You ever wondered why sometimes you make me cry  
You ever wondered what makes a woman smile, oh yeah  
It's just the little things, you do to make me smile  
You ever wondered what makes a woman cry  
You ever wondered why sometimes you make me cry  
You ever wondered what makes a woman smile  
It's just the little things, you do to make me smile  
You ever wondered what makes a woman cry  
You ever wondered why sometimes you make me cry

You ever wondered what makes a woman smile  
It's just the little things, you do to make me smile
