Let's Not Forget

Curtis Mayfield

Let's not forget though trying times there are
We have not lost the war, by far
Still work to be done and as the old hymn says
"We all can overcome"Let's not forget the sunrise in the sky
The love and wonders why, you don't do or die
But at best you try
Don't let life pass you byDo what you do when you're feeling free
You can be what you want to be
Open your mind and you can see
Baby, let's not forget this love is all we needKiss me once and maybe kiss me twice
Sweetens the spice of life my child
Just give me a smile
It is your big world to make it all worthwhileLet's not forget advice on love today
I'm really not so wise this way
So what do you say, two loving human beings
Just trying to make a wayDo what you do when you're feeling free, my baby
You can be what you want to be, right now
Open your mind and you can see, alright
Baby, let's not forget this love is all we needMy baby, my baby, my babyDo what you do when you're feeling free
You can be what you want to be
Open your mind and you can see
Baby, let's not forget this love is all we needDo what you do when you're feeling free, my baby
You can be what you want to be, right now
Open your mind and you can see, alright
Baby, let's not forget this love is all we needDo what you do when you're feeling free, my baby
You can be what you want to be, right now
