

Faithfully

John Berry

Some say it's just the nature of the beast
When you love somebody so passionately
Time has a way of stealing the raging fire feeling
Leaving the ashes laying at your feet Those fools with little faith will never know
Those higher places two hearts can go
Where time is standing still and love will burn until
The heavens and the earth have come and gone This fire inside for you, is constant as the northern star
And you will be forever in my heart
As long as there's a river searching for an endless sea
I will always love you faithfully Tonight we'll raise a glass to lovers across the ages
We'll hold each other and toast to the day
When history's said and done and we'll still stand as one
Some things were never meant to fade away This fire inside for you, is constant as the northern star
And you will be forever in my heart
As long as there's a river searching for an endless sea
I will always love you faithfully This fire inside for you, is constant as the northern star
And you will be forever in my heart
As long as there's a river searching for an endless sea
I will always love you faithfully
