Look At All The People

Boomkat

Ah, yeah
Look around
All their eyes are starin' at youLook at all the people
Starin' at you and you
They wanna see you do your best
So you better stand up to the testLook at all the people
Holdin' their breathe and know what's right
So feed it to them but make it good
And ease your mind 'cause you'll be understoodYou don't know me like you seem to think you do
If you look right next to you, you'll see you're not alone
But you try and feel, they'll steal it all from you
Give yourself some time to think just think things through, ooh
Think things throughLook at all the people
Starin' at you and you
They wanna see you do your best
So you better stand up to the testLook at all the people
They're waitin' to see if you've arrived
So lock down and look in their eyes
Know that this is your time, represent with no disguiseYou don't know me like you seem to think you do
If you look right next to you, you'll see you're not alone
But you try and feel, they'll steal it all from you
Give yourself some time to think just think things throughYeah, look at all the, yes, look at all the
Look at all the, look at all the
Look at all the people, people
People, oh yeahLook at all the people, ah yeah
Look at all the people, ah yeah
Look at all the people, ah yeah
Look at all the people, ah yeahYou don't know me like you seem to think you do
If you look right next to you, you'll see you're not alone
But you try and feel, they'll steal it all from you
Give yourself some time to think just think things throughYeah, yeah look at all the
Yes, look at all the
Look at all the, look at all the
Look at all the people
