

Black Nights

Johnnie Johnson

{One-two-three-four}Black night, white lights

 Your eyes amplify

 Like a heartbeat

 On the downbeat lover

 Black night, white lights

On the B-side, I found what I was afterBlack night, white lights

 You're so crazy nice

 Like a small town

 Filled with scyscrapers

 Black night, white lights

So divine, take me downtown be my saviourAnd the whole world is you

 On this black night

 Make everything come true

Under white lightsYou're on my radar, on my radar

 With your designer love

 Before things get much crazier

There's something you should knowYou're on my radar, on my radar

 With your designer love

 Sometimes when I watch you sleep

I think I made you upYou're on my radar, on my radar

 With your designer love

 Before things get much crazier

There's something you should knowYou're on my radar tonight

 You areBlack night, white lights

 Your hand is locked in mine

 Like a chain link

 Sealing the exit

 Black night, white lights

R.G.B.Y. this photo says I'm takenBlack night, white lights

 You're so crazy nice

 Like a small town

 Filled with scyscrapers

 Black night, white lights

So divine, take me downtown be my saviourAnd the whole world is you

 On this black night

 Make everything come true

Under white lightsYou're on my radar, on my radar

 With your designer love

 Before things get much crazier

There's something you should know You're on my radar, on my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know You're on my radar tonight
You are You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know You're on my radar, on my radar
With your designer love
Sometimes when I watch you sleep
I think I made you up You're on my radar, on my radar
With your designer love
Before things get much crazier
There's something you should know Oh, my radar
Oh, my radar, tonight
