

Night Gone Wasted

The Band Perry

Well you can find my face where the moon light lingers 'cause it's
Friday night and it's as hot as ever
Oh my heart is banging to the beat
Of the band
Me and my pals we got scars from the week
But now we're making our noise and we're moving our feet
As we do our best to let things get out of hand Oh it's a night gone wasted again
I'm making up with my enemies and loving my best friends
Well well well
It's the best medication to make the whole wide world go around
Oh it's a night gone wasted, oh yeah Well all of our eyes they got rings of fire 'cause we're
Burning time like, there's no tomorrow
Oh it's gonna take a while to blow off, a week's worth of steam
So tell your, your sweet mama not to worry her pretty little head
'Cause I'll have you home soon and then I'll tuck you in bed
But until then let's do our best to get out of hand Man oh man It's a night gone wasted again
Oh, I'm making up with my enemies and loving my best friends
Well well well
It's the best medication to help the whole wide world go around
Oh it's a night gone wasted
Oh yeah Oh what a riot it's been
I'm gonna save up some more money to spend
Another night Well well well
It's the best medication to help the whole population survive
It's a night gone wasted
Oh it's a night gone wasted
Oh it's a night night gone wasted
Tonight Alright
We're going out tonight,
Ha
