Lasting Values

In My Eyes

We shout our slogans at the top of our lungs
But in the end nothing's done
The game of pointing fingers
It's so fucking old
You gave up on what you said
The scene let you down so you move ahead
Just because you're gone
It's not fucking dead
We're all at fault but I'm not like the rest
(We still have faith)
Time's gone by I'll try my best
In the beginning we had the same goals
(We still have faith)
I feel the same but you grew so old
Are you trying to bring me down?
I've got faith but you turn it around
Negative feelings are all you give
That's not the way I want to live
We still have faith
Faith
We still have faith
You gave up on what you said
The scene let you down so you move ahead
Just because you're gone it's not fuciting dead
We're all at fault but I'm not like the rest
(We still have faith)
Time's gone by I'll try my best
In the beginning we had the same goals
(We still have faith)
I feel the same but you grew so old
So fucking old man
