

# Epoxy for Example

## Firehose

The burden is mine  
Born with the obligation  
To design real life connections  
But the gap is so wide! The struggle is like  
Using epoxy to bridge a canyon  
You gotta use both kinds  
A catalyst and a resin  
But wait 'til it dries Yo! it's all on my hands  
Can't touch nothing without becoming I can't understand  
Observing without interfering  
With what I really am
