

The Great Commandment

Camouflage

Some people suppress you
They parch you and reap a disaster
Re-education for the infants
Who demanded for an innocent instance The great commandment shows the contempt
Between the world and their embarrassing pavement
Believe the scholars, read the readings
Realize the man who says anything The great commandment The needies believe you
They treat you like survivors of a disaster
Re-education for the infants
Who demanded for an innocent instance The great commandment
