Star

Blake Babies

You ring me up and you bring me down
I never know if you'll come around
I like the salty taste in my mouth
Ten minutes on the lips, ten days withoutIf I were a star, would you look at me
When you're lying there in the dark?
If I called on you from far away
Would you say the things I want you to say?What would you say if I shined at night?
If everyone wanted a piece of my light?
Would you say the name?
Would you finally be the guy who can't get enough of me?If I were a star, would you think of me
When you're lying there in the dark?
If I called on you from far away
Would you say the things I want you to say?Just think of what I could be
And not what I am
The envy of every woman
The dream of every manIf I were a star, would you look at me
When we're lying there in the dark?
If I called on you from far away
Would you say the things I want you to say?
