

# Star

## Blake Babies

You ring me up and you bring me down  
I never know if you'll come around  
I like the salty taste in my mouth  
Ten minutes on the lips, ten days without  
If I were a star, would you look at me  
When you're lying there in the dark?  
If I called on you from far away  
Would you say the things I want you to say?  
What would you say if I shined at night?  
If everyone wanted a piece of my light?  
Would you say the name?  
Would you finally be the guy who can't get enough of me?  
If I were a star, would you think of me  
When you're lying there in the dark?  
If I called on you from far away  
Would you say the things I want you to say?  
Just think of what I could be  
And not what I am  
The envy of every woman  
The dream of every man  
If I were a star, would you look at me  
When we're lying there in the dark?  
If I called on you from far away  
Would you say the things I want you to say?
