

Collide

The Aftershow

[chorus]

It' about time we collided

I mean it

We got fire so ignite it

Lets light it up

One time we can find it

The feeling we lost lets find it again

[beat]

[verse 1]

Dreamt of you all night

You were back home you were mine

We were happy to be young

We were clueless we're in love

Woke up and realized

That this distance isn't right

I might fail but I tried

I need you by my side

[chorus]

It's about time we collided

I mean it

We got fire so ignite it

Lets light it up

One time we can find it

The feeling we lost lets find it again

[verse 2]

Regather my thoughts

all the aren'ts that are against us

But this can't get to my heart

'cause my head knows your not far

Soon I'll come across

All the love that I once lost

Fought from love just to start

It shouldn't be so hard

[chorus]

It's about time we collided

I mean it

We got fire so ignite it

Lets light it up

One time we can find it

The feeling we lost lets find it again

It's about time we collided
I mean it
We got fire so ignite it
Lets light it up
One time we can find it
The feeling we lost lets find it again

[verse 3]

You kept your seperate life
Seperated from mine
Long distance didn't feel right
I need you by my side
Or keep you close 'cause time
I need you by my side

[chorus]

It's about time we collided
I mean it
We got fire so ignite it
Lets light it up
One time we can find it
The feeling we lost lets find it again

It's about time we collided
I mean it
We got fire so ignite it
Lets light it up
One time we can find it
The feeling we lost lets find it again

[verse 4]

When we lost it
We lost a lot
What we lost lets find it again
When we lost it
We lost a lot
What we lost lets find it again
When we lost it
We lost a lot
what we lost lets find it again
When we lost it
We lost a lot
What we lost lets find it again
