

See You On The Outside

Blessthefall

Don't think I didn't see how you looked at me

What are you waiting for?

What are you waiting for?

I've spent those sleepless nights

And I'm waiting for

And I'm waiting for you

Sometimes I'd rather lie...

Oh, we found love

It takes me farther than I've ever known

I thought she'd take a shot on us

You're my only one, still be mine

And I'll see you on the outside

(see you on the outside)

I never fall asleep I always fall apart

I'm hopeless at best on my own

And I wish that I could close my eyes, pretend that you'd be by my side

Cause all I wanted was a face to call my own

All I needed was a place that feels like home

I think I'm falling for you (falling for you)

Oh, we found love

It takes me farther than I've ever known

I thought she'd take a shot on us

You're my only one, still be mine

And I'll see you on the outside

Let's make our way out of town

This place has fallen apart

No one knows you like I do

Let's make our way out of town

This place has fallen apart

No one knows you like I do

Let's leave it all far behind

We'll make it out of here alive

Let's leave it all far behind

No one knows you like I do

Sometimes I'd rather lie

(we found love)

(takes me farther than I ever knew)

Oh, we found love

It takes me farther than I've ever known

I thought she'd take a shot on us

You're my only one, still be mine

And I'll see you on the outside

Oh, I'll see you on the outside

Oh, I'll see you on the outside
