

The Lord of the Wasteland

Toxic Holocaust

We've got the flame burnin' in our hands
We've got the atom's power at our command Put a gun to your head
One pull you're dead
Out here we live and die by death We've got the ultra-violent force
Take what we need without recourse Overtake, overtake it all, The lord of the wasteland strikes Still got the
flame burnin' in our hands
Got an atom's power at our command Put a gun to your head
One pull you're dead
Out here we live and die by death Die by death Overtake, overtake it all, The lord of the wasteland strikes
