We Never Argue

Lambchop

We never argue
International velvet international underground
International coverage international i'd like to cover your buttWe never argue because we're never in the same place
In the redwood forest you're testing my will each day
To the new york island determined to get your wayInternational i see you international babe of mine
International police international calling card numberWe never argue because we're never in the same place
In the redwood forest you're testing my will each day
To the new york island determined to get your wayInternational rivers international ports of call
International secrets international objects of desireWe never argue because we're never in the same place
In the redwood forest you're testing my will each day
To the new york island determined to get your way
