Shining

X Ambassadors

Everything's changed, everything's changed
Pouring out liquor in the pouring rain
Let it go cold
Silent stage
Everything's changed, everything's changedAll my people in the same old bars
All my people with the same old scars
But everything's changed, everything's changed
Say what you, say what you willI've been living in the dark for a long, long time
But I see better at nightBaby, 'cause you, you are my shining star
Because you, you are my shining
You are my shining star
And I'll hold you closer if you go supernova
You will be, you will be
Forever my shining, ever my shining star
Forever my shining, ever my shining starEverything's changed, everything's changed
Your money don't talk
But the money don't rain
Everything's changed, everything's changed
The same old lovers with the same old gamesI've been living in the dark for a long, long time
But I sleep better at nightKnowing that you, you are my shining star
'Cause you, you are my shining
You are my shining star
And I'll hold you closer if you go supernova
You will be, you will be
Forever my shining, ever my shining star
Ever my shining, ever my shining starSee, I no longer care
See, I no longer care
See, I no longer
See, I no longer care
See, I no longer care
See, I no longer care
See, I no longer
See, I no longer care
See, I no longer care
See, I no longer care
See, I no longer
See, I no longer care
See, I no longer care
See, I no longer care

See, I no longerKnowing that you, you are my shining star
'Cause you, you are my shining
You are my shining star
And I'll hold you closer if you go supernova
You will be, you will be
Forever my shining, ever my shining star
Ever my shining, ever my shining star
Ever my shining, ever my shining star
