

# You and I

## Magna Carta

just words I know yet never say more  
and here I am on empty highways  
just you and I  
on restless seas I need you here like day needs the light  
without you there's no beginning  
without you  
There is no end telephone ringing in the dead of night  
I call your name  
and in my heart there is no other  
just you and I and one another  
just you and I till the end of time  
no one can say who shapes the rules  
who tunes our lives to one another  
just you and I and one another  
just you and I till the end of time  
just you and I till the end of time
