Truth and Justice

Lagwagon

Yeah
Truth and justice
And I can't wait for we have to know the truth
And what they say is justice
What we see
All lies, it's justice, a bullet in your fucking faceAnd you believe in the system, believe this whole fraud, the media's lies, the
evening you're loaded from within the day, what have you seen, the empty
street, that thing, I can't propel it, probably I will, what is right, truth
and justice?
And I can't wait, where's the fucking truth?
And what they say is justice
What we see
All lies, it's justice, what do you believe, the people always look away
Their interest strapped to decay
And the people always come on fast
Knocked and stole neighbor's cash
Fuck justice
Justice (x2)Between a lie and your cardboard are your interests, you're to weak to strike,
the fucked up incest, the woman in the other street liked them again, can we
still burn up before our dying countrysJustice, justice, justice, justice
