

Face to Face

[Finley Quaye](#)

We are only scratching the surface
There is a time and a place for confrontation
Since we got together
Since we all got together again I found the key
Heavenly conversation
I can't make it alone
And when I'm with you
I want to be with you Face to face, who am I to say?
After all the things I said along the way
Face to face, who am I to say?
After all the things I said along the way I want to know about it
Your sense of freedom
We need nutrition
If we're gonna turn this around Let's emanate from the depths of depression
It's not too late, you made a great impression
There is no replacement and no substitution
If we're really gonna care and share
You have made us aware Face to face, who am I to say?
After all the things I said along the way
Face to face, who am I to say?
After all the things I said along the way
